

## Rock Story Foldable

- Take a piece of computer paper and fold it into three sections.

- Label each of the three sections: Igneous Rock, Sedimentary Rock, Metamorphic Rock

| Igneous Rock | Sedimentary Rock | Metamorphic Rock |
|--------------|------------------|------------------|
|              |                  |                  |

- **You will become each of these rocks. Describe a story for how each of the three different rocks form. Your story should connect through each of the three rocks. Use some of your vocab words when describing how each rock forms. Think about the processes each rock goes through.**
- **Draw a picture on one side and write the story on the other side.**
- **Make sure to color your picture!**
- **The story should be in first person. (Remember you are the rock!)**

Look at the examples PDFs below. This assignment is due Tuesday, January 30<sup>th</sup>!

### Sedimentary Rock

One day a squirrel was jumping around with nuts in his hand and trotting with his other hand when he seen a berry. The squirrel decided to try it, not knowing it was poisonous.

Sadely the little guy passed away, and was cemented together by the heat and pressure. The decay of the squirrel and some leaves were used to form a Sedimentary rock.

### Metamorphic Rock

The day it all happened was when I, Pressure, was changed. I live deep inside Earth, with tons of other rocks. But this wasn't my first home, I lived up on a mountain. I was then eroded off the mountain and landed on earth's surface. I then ended up being pushed down by the other rocks and once I got hot enough, I changed and turned into a metamorphic rock.

★ 10/10<sup>12</sup> creativity

### Igneous Rock

Hi, my name is hot rock. I live in the earth. On this special day, I felt a sudden shake in the earth. Suddenly I rose up a tall mountain type thing and I was outside of earth.

My friend were with me but we realized something was weird, we were cold.

This isn't normal we all figured, but before we had time to think more, we were a rock and not just any type of rock, we were Igneous Rocks!

Don't forget to write your story about how each rock formed on the back of the drawing.
